# ALL-TIME LEADING BROTHERS COMBINATIONS

compiled by A. Lennart Julin (Stockholm, Sweden)  
(as of Jan. 1, 1973)

The compiler wishes to acknowledge the important role of Andrew Huxtable (GB) in this compilation, whose original lists this is based on. The author has been strict in accepting claimed relationships, and no questionable performances are carried herein. It is realized that there is a certain degree of incompleteness to this list (e.g., few listings from the USSR), and any and all amendments (with complete information) are welcome.

It should be noted that the disparity created in the PV by the Portuguese Tables (which are used to score these pairs) gives a heavy weighting to that event. Seven of the top 12 pairs contain at least one fiberglass vaulter. This list contains (from left to right): total Portuguese points, last name and nation, name of high-scoring brother with mark, value on tables and date, low-scoring brother with similar information. \*=twins.
