Pennel Sails 16'6" in Sternberg Benefit

Seattle, Wash., Aug. 17--John Pennel soared 16'6" but had a futile attempt to become the first man over 17-feet with three misses at 17'1".

Pennel was vaulting at the University of Washington Stadium during the half-time attraction of the Kansas City Chief--Oakland Raiders football game. A percentage of the profits from the sports attraction were to have been presented to Brian Sternberg toward his rehabilitation. But the sports spectacle, which also included a Brian Sternberg Mile, lost \$35,000. Nevertheless, Brian will receive a guarantee of \$3000--\$1000 from each of the teams and Greater Seattle.

John Uelses cleared 16'1", as both he and Pennel busted Sternberg's own stadium record of 15'7 $\frac{1}{2}$ ".

Jim Grelle took the mile in 4:04.4, wiping out the stadium record of 4:06.9 which he set while at Oregon in 1959. He beat Keith Forman who was timed in 4:05.9.

Brian was able to view the proceedings by closed-circuit television in his University Hospital room. During the half-time, he expressed his appreciation to all concerned.

Distance Runners Shine in USSR Champs

Moscow--The USSR national championships had a few outstanding, world-ranking performances but it was the quantity of good marks in almost every event that was impressive.

The 3000 meter steeplechase was remarkable in that only 4.4 seconds separated the winner, who was timed in 8:37.6, and the eighth place finisher. Fifth, sixth, seventh, and eighth placers all achieved the best non-winning marks for those places.

The 5000 was nearly as outstanding. Yuri Tyurin recorded a 13:48.4 for first, while sixth place was 13:58.8. Leonid Ivanov, who was second in 13:49.2, also captured the 10,000 in 29:08.8.

The Soviet athletes are continuing to show more strength in the shorter races. Three men, led by Valeriy Bulyshev in 1:47.7, completed the 800 under 1:48.0. Vadim Arkhipchuk took the 400 in 46.5 while Edvin Ozolin won both the sprints, his 20.9 being faster than his 10.5.

In the field events, Valeriy Brumel and Igor Ter-Ovanesyan had only fair performances although both won their specialties. Brumel scaled 6'10 $\frac{3}{4}$ " while Ter-Ovanesyan went 25'11". Bliznetsov recorded a new Soviet record in the pole vault with a mark of 15'5". Varanauskas, who did not compete against the U.S., won the shot put at 61'4 $\frac{3}{4}$ ", followed by Karachev and Lipsnis at 61' $\frac{1}{4}$ " and 60'4 $\frac{1}{2}$ ".

In other competition, Gennadi Kondrashov won the hammer throw at 220'6" in an event in which sixth place was 210'9 $\frac{1}{2}$ ". Garaiev upset the field in the triple jump with a 53'7 $\frac{1}{4}$ " mark.

100, Ozolin 10.5 (10.4 by Kasanov in the semi-finals). 200 Ozolin 20.9; 2. Archipchuk 21.4. 400, Archipchuk 46.5; 2. Sverbetov 47.2; 3. Anisimov 47.3; 4. Frolov 47.6. 800, Bulichev 1:47.7; 2. Tolp 1:47.9; 3. Krivocheiev 1:47.9; 4. Savinkov 1:48.2; 5. Simbirchev 1:49.8; 6. Gonchariev 1:50.1. 1500, Savinkov 3:44.9; 2. Belitski 3:45.3; 3. Karaulov 3:46.7. 5000, Tyurin 13:48.4; 2. Ivanov 13:49.2; 3. Samoilov 13:49.4; 4. Yefimov 13:53.2; 5. Dmitriev 13:57.6; 6. Orentas 13:58.8; 7. Dutov 14:04.4; 8. Potiekin 14:07.8. 10,000, Ivanov 29:08.8; 2. Khuzin 29:21.2; 3. Pennel Claimant to First 17-Foot Vault

Miami, Fla., Aug. 24--John Pennel had hardly cleared history's first 17-foot vault when he began speaking of 18-feet.

"I'll be shooting for 17'3" or 17'4" now. But the first 17-footer was the big thing," the Northeast Louisiana State College senior said.

Pennel, 23, cleared 17'0 $\frac{3}{4}$ " on his first attempt during the Gold Coast AAU championships. He later failed in three tries at 17'4". The new mark erases his own pending height of 16'10 $\frac{1}{4}$ " set in London during the U.S.--Great Britain match.

The record vault actually came under pressure of a threatening thunder storm; Pennel appealed to officials: "Let's get it over with before it pours." The storm never did materialize and he was able to make three attempts at the higher height.

He has now raised the world mark six times this year and matched it another.

Pennel explained he had the uprights moved forward slightly in order to put the bar under him at the very peak of his leap.

"I rocked back when I went up, too, more than normal. Heretofore, I've been using the uprights a little too far back. About missing 17'4" a half hour later, I simply cooled out while they were measuring the record."

He didn't have much competition. John Uelses did not participate, and former high school teammate Henry Wadsworth dropped out under 15'0".

Foreign News

Auckland, N.J., Aug. 24--Bill Baillie of New Zealand turned on a burst of speed over the final three laps to break two world records.

Baillie ran 20,000 meters in 59:28.6 and covered 12 miles, 960 yards in one hour to eclipse two standards held by Emil Zatopek of Czechoslovakia. Zatopek held the marks of 59:51.7 for 20,000 meters and 12 miles, 807 yards for one hour.

1963 U.S. Relay List

Listed below are the best relay performances in the United States in 1963. This year they are listed in the order of best times and not as they were ranked in the August issue of Track and Field News. However, all teams ranked, which in some instances included the 11th fastest team, are listed with a progression of their competition. The remaining teams on the 25-deep list are ranked according to best time.

Tennessee Governor Declares Track Week

by Hal Canfield
President, Knoxville Track Club

The Knoxville Track Club has been busy this summer with the promotion of summer track events in Knoxville and the East Tennessee area. We have had four All-Comer meets during the past three months in which approximately 200 athletes have competed in each meet. As a matter of fact, it was necessary, in many events, to run five or six preliminary heats in order to give all the runners a chance to compete. A good share of these groups were made up of young boys in the 10 to 12 and 13 to 14 age groups which seems to indicate that the young boys are interested in a summer program of track if one is made available.

We operated these meets usually in several divisions: Midgets (ages 10-12), Boys (ages 13-14), Juniors (ages 15-17) and an Open division for those over 17 years old. We also included several special events for girls and had quite a fine response.

Also, in connection with our summer program, we have been holding practice sessions for all interested in working out twice a week in the evenings. The Knoxville Track Club has provided instruction and coaching at these sessions and the progress in some of our athletes is quite amazing.

We have held two large meets during the early summer in which some of the finest runners in the South were in attendance. The biggest of these meets was held during the first week of June. Through the KTC's planning and promotion, we were able to have the first week of June declared Track and Field Week in the entire state of Tennessee. We had a whole series of events taking place during this time. Included were a track club banquet in which about 150 area track buffs attended. The most unique event of the week was a 425 mile relay run from Memphis to Knoxville. Some 80 runners from various sections of the State took part in this run, each running distances from 2 or 3 miles to 10 or 15 miles. We carried a relay baton in which was sealed the "Track and Field Week" proclamation from the Governor of Tennessee and a letter from the Mayor of Memphis to the Mayor of Knoxville. These were read at a gathering in Knoxville at the time of arrival some 51 hours and 18 minutes after it left Memphis. We feel that through this event, we have set some sort of a record for I could find no records of such an event in any other areas of our United States.

As for the fall and winter months, we have several events scheduled. In October we have another large track meet planned. Last year at this time we had teams from seven or eight Southeastern states in addition to teams from Southern Illinois, Arkansas State, Kentucky, and Ohio. We are hoping for an even better entry list this year. Later in the fall and early winter, we have plans to run a series of road races and cross country meets. Our weather is quite good for this type of event during most of the winter months and it is our hope to attract some of the fine long distance runners in the North and East where the weather is so extreme that good running conditions are nonexistent.

Profile of a Champion

George Joseph Desnoyers, Jr. of Boston College won the NCAA hammer throw title by virtue of his second best toss. Both he and Art Doten threw 190'2" on their first throws, but Desnoyers then managed 189'1" and 189'3" to better Doten's second mark. George, who graduated this spring, will begin coaching in November of this year, thereby sacrificing his amateur standing.

Born April 27, 1941 in Springfield, Massachusetts, he stands 6'3" and weighs 230 pounds, and has light brown hair and hazel eyes.

Progression:

Year	Grade	Age	HT	DT	SP	HJ
1954	7	12				5'0"
1955	8	13				5'2"
1956	9	14	dnc			
1957	10	15		120'0"	42'0"	5'6"
1958	11	16		130'0"	47'0"	5'7"
1959	12	17			50'0"	5'8"
1960	Fr	18	144'0"		47'0"	
1961	So	19	172'9"	145'0"	50'0"	
1962	Jr	20	189'1"	150'0"		
1963	Sr	21	194'1½"			

He actually considers the high jump his favorite event, "but this year I weighed 245 most of the season and did not jump much (5'6")." Now that he has finished competing, he will teach chemistry at a high school and serve as assistant track coach at Tufts. His personal ambition is to "coach all events well and to run a 53.0 quarter."

Profile of a Champion

Jerry Brian Dyes has good speed and strength to become a strong decathlon prospect. His best events are the javelin, triple jump, and broad jump, where he has life-time bests of 254'6½", 50'3¾", and 25'3½". Next year he hopes to hit 260-feet in the javelin, and accomplish the following performances during a decathlon: 10.6, 24'8", 52'0", 6'2", 48.5, 14.8, 13'0", 145'0", 250'0", 4:25, which would give him around 8976. Of course, all this depend on whether he can remain injury-free next year.

Born May 28, 1942 in Shreveport, Louisiana, he stands 6'1" and weighs 190 pounds, and has brown hair and blue eyes.

Year	Grade	Age	JT	TJ	BJ	100	440
1957	10	14		41'5¼"			
1958	11	15	169'2"	43'6"	22'1½"		
1959	12	16	194'4¼"	45'3¼"	22'11½"		51.2
1960	Fr	17	225'1"	50'2¾"	23'7"	10.2	49.0
1961	So	18	243'6½"	48'0"			
1962	Jr	19	250'3½"	49'11¾"	25'3½"	9.8	48.6
1963	Sr	20	254'6½"	48'9"	24'10½"	9.6	48.4

Athletes Invited to Pre-Olympic Meet

Tokyo--This is the official list of athletes invited for the pre-Olympic meet in Tokyo in mid-October.

- 100: Gamper (Ger) and Carr (US).
- 200: Gamper (Ger) and Carr (US).
- 800: Dupree (US) and Snell (NZ).
- 1500: Jazy (Fr) and Snell (NZ).
- 5000: Jazy (Fr), Bogey (Fr), Tulloh (GB), and Ivanov (USSR).
- 10,000: Bogey (Fr) and Ivanov (USSR).
- 110 H: Willimczik (Ger) and Rogers (US).
- 400 H: Dyrcka (Argentina).
- 3000St: Roelants (Bel) and Persson (Sweden).
- BJ: Eskola (Fin) and Ter-Ovanesyan (USSR)
- TJ: Tomlinson (Australia), Schmidt (Pol), Zolotariev (USSR)
- HJ: Sneazwell (Australia), Csernik (Pol), and Brumel (USSR).
- PV: Pennel (US).
- JT: Nevala (Fin) and Lusia (USSR).
- HT: Bakarinov (USSR) and Connolly (US).
- Decathlon: Walde (Ger) and Yang (Formosa).
- Marathon: Abeba (Ethiopa), Vandenriessche (Bel), Kilby (GB), Julian (NZ), Baikov (USSR), and Edelen (US).
- 20,000 Walk: Schreiber (Ger) and Golubnitschi (USSR).

The Distance Runner

by Harry Browne

"Run for Fun" is the song they sing
And surely it must be,
For in numbers they increase each day
And glad pay the penalty.

When seriously you view your sport
The sacrifice seems small,
To take your place in the winner's space
With your record in Fame's Hall.

But what of the honest runner who
Will work out twice a day
And watches weight, what is his fate
When back in the pace to stay?

Here's to the man, the "also ran",
Whose reward is the dust and sweat,
Who rarely eyes the first place prize,
What does this runner get?

He receives the plaudits of the crowd
Who know of the strain it cost.
And he does not rest 'till his personal best
Improves though the race is lost.

He joins a certain special group
Where the fee to join is pain,
With "one more repeat" on blistered feet,
Or it's "marathon train" again.

With endless warm-up and taper-off,
Pickups and sprints for wind,
When the shin splints endin' the Achilles tendon
Begins to hurt like sin.

These are a part of "the toughest sport"
And you're a part of it too.
There are few you'll find who can take the grind,
But you'll be a man if you do.

History of Pole Vault

by Ray Kring

Track Coach, Pittsburg (Calif.) High School
Part XI

Seven men sailed over the 13 foot figure during the Olympic year 1924. An 18-year-old youngster from Hollywood (Calif.) High School, had the best height in the world that year, in the absence of Hoff who had broken an ankle. Lee Barnes won the Southwestern Olympic Tryouts in Los Angeles with a jump of 13' 2 $\frac{1}{8}$ ". Ed Meyers retained his AAU crown clearing 13 feet, while McKown had a best of 13' $\frac{1}{2}$ " in winning his second Kansas Relay title.

At the Final Olympic Tryouts held in the East on June 14, 1924, Jim Brooker of the University of Michigan, Ralph Spearow of the University of Oregon, Glen Graham, an 18-year-old student at the California Institute of Technology, and Barnes all cleared 13 feet the greatest tie in pole vaulting history, up to that time.

Another young vaulter who should be mentioned is Sabin Carr of Hill School, Pottstown, Pa. Carr won the Eastern Olympic Tryouts in New York City by clearing 12' 9". This lad was destined to add much to the history of the pole vault in later years.

The VIII Olympiad in Paris in 1924 was highlighted by the all-out effort of the French government to make the 30th anniversary of the rebirth of the Olympic Games an important international athletic meeting and not the fiasco of 1900. The great hero of the track and field competition was Paavo Nurmi of Finland, while the 18-year-old American pole vaulters, Lee Barnes and Glen Graham, tied for the pole vault title. Both Barnes and Graham cleared 12' 11 $\frac{1}{8}$ ", but Barnes won a jump-off at 12' 11 $\frac{1}{2}$ " and was declared the winner. The third place went to Brooker at 12' 9 $\frac{1}{2}$ ", while Henry Pedersen of Denmark was fourth at 12' 9 $\frac{1}{2}$ ", and Victor Pickard of Canada was fifth at 12' 5 $\frac{5}{8}$ ". Sixth place went to Ralph Spearow of the U.S. with a height of 12' 1 $\frac{3}{4}$ ". After the Games were over, Spearow toured Japan, and at a meet in Tokyo was credited with a vault of 13' 10 $\frac{1}{4}$ ". This mark exceeded Hoff's world record, but due to some unknown reason it never went on the books as an official record. Whatever the mark cleared by Spearow that day, his form seemed to give inspiration to the Japanese vaulters.

Another significant event that took place in 1924 was the first official use of the standard wooden vaulting box. It was first introduced at the Paris Games. As was pointed out earlier, since 1900 a hole dug in the ground in front of the pole vault pit was all that was used for planting the pole. In order to establish some form of uniformity, the NCAA rule book as late as 1924 carried this note about planting holes:

This planting hole should be approximately nine inches deep, 18 inches wide and should be sloped back to a distance of 36 inches.

Concerning the adoption of the wooden planting box, Gilbert said: I think I was chairman of the track and field committee of the AAU, I know I represented them at the International Federation meeting when the box was adopted officially, although I know in California and I know in Yale we used it long before it was officially adopted. They didn't adopt the one we tried to get adopted, but it was approximately the same. . . . The dirt holes, none of them were alike, and there was always an argument how deep you should dig them - that's why the box was adopted.

The 1926 NCAA Official Rule Book carried this rule, and it is essentially the same today:

It is recommended that a wooden box be used for the planting pit. The box should measure 3' 4" in length and 2' wide at the front, tapering to 6" in width at the stop-board, which shall be 8" deep. The box shall be so placed that the front and the tops of the side and stop-board shall be flush with the ground and the stop-board at right angles with the ground and placed flush with the landing pit.

The year 1925 saw the return of the Norwegian world champion, Charles Hoff, to the pole vault wars. Hoff started his record shattering assaults by scaling 13' 10 $\frac{1}{2}$ " to better his own world record of 13' 9 $\frac{3}{4}$ ". And then on Sept. 27, 1925, at Turku, Finland, he lifted himself to his all-time best of 13' 11 $\frac{3}{8}$ ".

Meanwhile, in the United States, the top vaulters of that year proved to be McKown, with a new Kansas Relays record of 13' 2 $\frac{7}{8}$ " and Jack Williams of Inglewood (California) High School, set a new SPA Interscholastic record of 13' 1 $\frac{5}{8}$ ".

It is of importance at this time to mention the great contribution that Hoff made to the advancement of technique in the pole vault. Hoff was the first man to introduce the fly-away form of clearance style as we know it today. This style differs from the old jack-knife type of clearance, in that the feet do not drop down below the level

of the cross-bar until the pole is released. The introduction of this form has probably contributed more to the great progression of records in the pole vault than any other phase of vaulting, with the exception, perhaps, of the introduction of the hand-shift.

Hoff was again the big news item in track and field of 1926. Hoff was invited to tour the United States and participate in a number of meets across the country. Three of his appearances were to be at Seattle, San Francisco, and Los Angeles. The "Norwegian Eagle", as the newspapers of the day tagged him, competed at Seattle in the Washington Relay Carnival, and cleared 13' 8". He was then supposed to vault in a meet in San Francisco the following week. However, he sent a telegram to the promoters of the San Francisco meet and told them he would be unable to appear. He was informed by the AAU that if he failed to perform at San Francisco, he would not be permitted to compete in Los Angeles, his tour would be cancelled and he would be sent home. Hoff failed to show up in San Francisco. His claims of being tired and in poor shape were not held by the AAU as being valid, and his travel permit was revoked.

Also, at about this time, allegations of irregularities in his expense account were brought forward, and Hoff was declared a professional. Lawrence Robinson of the New York World-Telegram, had the following to say about the "Norwegian Eagle":

The year after Nurmi's invasion, another visitor came over, a pole vaulter named Charles Hoff from Norway, who it developed was a magnificent vaulter ahead of his time but slightly obscene on the expense-account side, an item that culminated with his turning out a Quisling when the Nazis besmirched his native land.

Thus ended the brilliant career of one of the greatest champions the pole vault has ever known. The fine points of technique contributed to the art of pole vaulting by this man went a long way in helping to form the styles of the record breakers to come. And what became of Hoff himself, after that? He joined a vaudeville troupe and toured the nation giving vaulting exhibitions on stage, between the vaudeville acts.

Pole vault competition moved right along during 1926, despite the unfortunate happenings of Hoff. Lee Barnes had enrolled at the University of Southern California and set a new intercollegiate record at the annual PCC meet in Palo Alto, with a jump of 13' 8". Glen Graham of the California Institute of Technology won the SPAU meet at 13' 3" and Carr, the former Hill School star, competing for Yale University, also cleared 13' 3". Hoff that year, wrote a letter to a friend in England, and predicted Carr would be the first man to clear 14 feet.

Paul J. Harrington of Notre Dame, whose son was to become one of the world's top vaulters during the 1950's had a best outdoor mark of 13' $\frac{3}{4}$ ", and in a dual meet with Illinois, on a dirt runway indoors, cleared 13' 1 $\frac{1}{8}$ ".

This brings to a close the 13 foot era of the pole vault, and takes us up to a brand new dimension if pole vaulting, the 14-foot-pole vault.

New York state's AAU meet was highlighted by a 9.6 for the 100 by Chuck Gullo (East, Kenmore, N.Y.) on August 10 at Elmira. Ed Hanks (Hoover, San Diego) high jumped 6' 7 $\frac{1}{2}$ " in an Olympic Development meet on August 3 at San Diego. New Zealand's Eddie Rompelberg was born in Holland, and did 9:30.6 for the steeplechase (3-km) on February 9 at age 17. He did three miles in 14:30.8 February 18th, two miles in 9:04.2 March 18, a week before his 18th birthday.

Top U.S. Milers, 1959-1963

by P. J. Matthews

The following chart on the top U.S. milers between 1952 and 1963 is determined by averaging each athlete's five best times, including indoor marks. The time in parenthesis is the athlete's lifetime best. Following the list the author has picked his best U.S. milers during the same period.

Jim Beatty	3:56.3 (3:55.5)	Morgan Groth	4:03.2 (4:00.8)
Jim Grelle	3:57.1 (3:56.1)	Ernie Cunliffe	4:03.6 (4:00.4)
Dyrol Burleson	3:57.3 (3:55.6)	Bill Dellinger	4:03.7 (3:59.7*)
Cary Weisiger	3:57.9 (3:56.6)	Archie San Romani	4:03.9 (4:03.1)
Tom O'Hara	3:58.8 (3:56.9)	Harry McCalla	4:04.3 (4:01.5)
Bob Seaman	3:59.8 (3:58.0)	Fred Dwyer	4:04.4 (4:00.8)
