/TrackStats

Greetings to all fans of TrackStats! We trust that you all enjoy the statistical material we have been bringing you for the past few months. And now that Track Newsletter is in its weekly stage, we will be able to offer about five pages of statistics per issue.

We are anxious to have some reader comment on TrackStats. Is it worthwhile to you? Which features have you liked? Which have you disliked? Which would you like to see more of?

These questions grow important to us as we deplete our stock of readily-available material. With an eye to the future, we can see that we will need more things. We already have a small core of "nuts" working on various projects, but even they can accomplish only so much. Would you like to help? Even though we have uncovered several new talents, we certain that there must be more budding "nuts" among the readership. Are you working secretly on a project that might be shareable with others? Write and let us know.

To give you an idea of what sort of projects we have in mind, here is a listing of some of the things that we would like to see pursued:

1. Career progressions of top athletes.
2. Continental records—the best marks ever recorded by athletes from each of the continents, and the best marks ever recorded on those continents (soil records).
3. Club records—a comparison of the records of major US track clubs (and perhaps even a comparison with major clubs in other parts of the world).
4. Decathlon performances—what are the best (10?) marks ever recorded in each event of the decathlon, during decathlon competition?
5. Dual meets—make up your own. e.g., California versus the rest of the US or the world.
6. Ethnic or racial records—black, oriental, caucasian, etc.
7. Best high jumpers by style—all-time list of floppers, western rollers, etc.
8. High jump differential—who are the jumpers that have cleared the greatest height above their heads?
9. High school mortality—what happens (statistically) to the top 10 preps in an event during the next five years?
10. Progress by age—the top 10 performers in one event on the all-time list. How did they compare at various ages?
11. Record progressions—world indoor, and indoor and outdoor for the US, European, collegiate and prep.
12. Winning streaks—which athletes have put together the most meets without a loss?

Those are some of the projects we would like to see pursued. Some of those already in progress include:

1. Age records.
2. All-time lists—world, US, collegiate, age-group, etc.
3. Averages of marks.
4. Brother combinations, father-son combinations, twins.
5. School records comparison.
6. State records comparison.
7. Stadium records comparison.
8. All-time relay splits (and averages).
9. Combinations—100/200, 1500/5000, etc.
10. Non-winning bests (and best marks for place).
11. World outdoor record progression.

Some of these projects have been done in years past and only need updating. Others have never been tackled and are just waiting. There are many other projects open to research. If we have any preliminary research material available we will pass it along to whomever we assign the project.

If you are interested in being a part of this program, please contact us at your earliest convenience (All material is submitted on a volunteer basis, there is no pay). Give us some brief background information on your qualifications for doing this work, what you want to do, and very importantly, what research materials you have available. Please direct all correspondence on this matter to TrackStats, Track & Field News, Box 296, Los Altos, Calif., 94022 USA. Please do not expect an instantaneous (or detailed) response. But we will get in touch:
