

The Sub-4 Alphabetic Register

(1663 athletes as of April 13, 2021)

WITHIN A YEAR of the death of the first sub-4:00 miler, Sir Roger Bannister, at the age of 88, the total number of athletes who have broken through the once historic barrier was already past 1550, and no country has kept greater faith with the legend of the sub-4 mile than the USA.

Even during the COVID-ravaged year of '21 there were 51 men who broke 4:00 indoors, of which 32 were Americans. Outdoors in '20 there were 33 who enterprisingly did so in Australia, Great Britain, Italy, Lithuania, Norway, Switzerland and, of course, the USA.

The total of US sub-4 milers is now 594, far ahead of Great Britain's 215 and Kenya's 152, with no other country yet nearing 100. The year '21 has very soon passed another landmark, as Nick Willis, of New Zealand, has broken 4:00 for a record 19th successive year. The previous best of 18 was held by his countryman John Walker, but Steve Scott of the USA, is still the most prolific sub-4 miler in history, with 137 such times to his credit.

Elsewhere, even the distant past has eventually yielded its secrets: a hitherto overlooked performance from as long ago as 1974 by a Bulgarian was not discovered until 36 years later! Bulgaria remains something of a mystery because another sub-four minute mile by a Bulgarian in '92 (no venue or exact date) has only recently been caught up with!

There are now 19 sets of brothers, including 5 sets of twins, and 11 sets of fathers and sons who have broken 4:00. The most recent contributors to this family tradition are Jakob Ingebrigtsen, brother of Filip and Henrik Ingebrigtsen; John Coghlan, son of Eamonn Coghlan; Johnny Gregorek, son of John Gregorek; Liam Dee, son of Billy Dee; Jamie Williamson, son of Graham Williamson, and Cruz Culpepper, son of Alan Culpepper.

The Gregoreks, of the USA, both named John (though the son is known as Johnny) are the most successful father/son miling partnership, based on the average of their best times. The Ingebrigtsens are the first set of three brothers to break 4:00. No grandfathers and grandsons have done so as yet!...

An important point to make is that no two athletics statisticians, however knowledgeable, are likely to agree on exactly how many sub-four-minute milers there are. The highly authoritative US magazine, "Track & Field News", maintains a list of American sub-4 achievers in chronological order, compiled originally by E. Garry Hill and now by Jim Rorick, and their total number is less than in this Sub-4 Alphabetic Register! It is of no matter because their criteria vary slightly, and in any case it is an invaluable source of data.

Performances listed in this Register represent the first occasion on which the athlete ran sub-four-minutes for the mile, followed by the all-time personal best if there was a subsequent improvement. Some 65% of the 1663 athletes listed have not bettered their first Sub-4 performance, though there will be those from the more recent years who will obviously do so eventually.

Performances listed in tenths-of-a-second were recorded manually, and it may be that some of these were also automatically recorded and the figures not made public, but as they mostly date back 30 years or more it is very unlikely that such data will ever come to light. The standard middle-distance event in international competition has for more than a century been the 1500 metres, and but for this there would certainly be at least three times as many sub-4 milers as there actually are. Maybe someone would like to compile a list of all those who have broken 3:43.00 for 1500 metres but not 4:00.00 for the mile!

No distinction has been made between indoor and outdoor performances, nor for so-called "oversize" indoor tracks. Indoor performances are marked "i". Performances marked "+" were made *en route* in races of a longer distance; these were usually 2000 metres, though iBrian Treacy's time was achieved as the pacemaker in a 2M race and Salah Hissou's time was in a race at 3000 metres.

The decision has also been taken to include relay performances, while appreciating that there can be some advantage (of a few tenths of a second or so) to the out-going athlete from a running start. There are only 10 athletes in the list with a superior relay time to any they achieved in a conventional mile race, and four of those also ran Sub-4 in the latter circumstances.

Three other performances require clarification. The personal best by Antonio ("Tony") Colon, of Puerto Rico, other than in a relay was achieved in a mile race which was slightly under-distance (1,757 yards) where he recorded 3:58.8, to which 0.5sec has been added (*). The personal best for Steve Crabb (GB) was achieved off "scratch" in a handicap race ("hc"). German athletes prior to unification have been listed under their separate countries, Federal German Republic (FRG) and German Democratic Republic (GDR), though the national total for Germany as a whole includes both. For athletes from the former Czechoslovakia, the Soviet Union and Yugoslavia there is also listed, where known, their republic of origin or future independent country (based on place of birth).

For athletes who ran Sub-4 on behalf of two different nations the best performances are given for each. A number of athletes – 30 in all – either changed nationalities or had dual citizenship, as follows:

Ibrahim Aden – Somalia/USA, sub-4 for both.
 Steven Agar – Dominica/Canada, sub-4 only as Dominican.
 Robert Kiplagat Andersen – Kenya/Denmark, sub-4 for both.

Note: 75 countries listed, but Czechoslovakia, Federal Republic of Germany, German Democratic Republic, Rhodesia & Nyasaland, USSR and Yugoslavia no longer exist. Rhodesia & Nyasaland is still listed above because at the time of its existence (1953-1963) it included both Northern and Southern Rhodesia, which would become Zambia and Zimbabwe. The total numbers nation-by-nation do not tally precisely with the total number of individuals listed in the Register above because there are athletes who have run Sub-4 on separate occasions as representatives of two different nations.

Grandfathers and grandsons: No grandfather and grandson have yet both recorded sub-four-minute miles. There is one sub-four-minute miler who has a grandfather who competed in the Olympic Games. The pair are Clarence Robison, who took part in the 5000 metres heats for the

USA in the Games of 1948, and whose fastest mile was 4:14.8 in 1949, and Nathan Robison, won ran 3:59.99 indoors in 2014.

The most durable and the youngest Sub-4 runners:

Anthony Whiteman (GBR) set a World over-40 age-group record of 3:58.79 020612. He had first broken four minutes 17 years before. Jakob Ingbriksen (Norway) ran 3:58.07 on 270517 at the age of 16 (his two elder brothers also broke four minutes, though not for the first time, in a separate race at the same meeting).

Note: A notable absentee from this list is the World record-holder at 5000 metres, Joshua Cheptegei, of Uganda, who has not yet run a mile race. His best 1500 metres is 3:37.82, set in 2016, but in his 5000 metres record he averaged 3:46.5 per 1500 metres, and this is equivalent to a mile in 4:04.0 (rounded off time) according to the Hungarian Scoring Tables.

Only two of the 45 Olympic 1500 metres medallists since 1956 have not been Sub-4 milers: Klaus Richtzenhain (GDR) and Ivo van Damme (Belgium), the silver-medallists of 1956 and 1976 respectively. This was clearly a matter of opportunity, rather than ability, and particularly so in the case of van Damme, who was killed in a car accident less than five months after the 1976 Games, aged 22. There are 12 Olympic 1500 metres finalists in all from 1956 onwards who have not run Sub-4 for the mile, of which the most recent is Ronald Musagala (Uganda), 11th in 2016. None of the seven in the list below from 1972 onwards, including van Damme, appear to have ever raced at the distance. The Olympic 1500 metres finalists from 1956 onwards who are not Sub-4 milers, with their best one-mile times, where known, are as follows:

1956: 2 Klaus Richtzenhain (GDR) 4:01.8, 7 Neville Scott (New Zealand) 4:01.2, 8 Ian Boyd (Great Britain) 4:03.2. 1960: 5 Zoltán Vamos (Rumania) 4:06.7, 9 Arne Hamarsland (Norway) 4:00.8. 1972: 6 Herman Mignon (Belgium) 4:06.1, 8 Vladimir Panteley (USSR). 1976: 2 Ivo van Damme (Belgium). 1984: 11 Riccardo Materazzi (Italy). 2004: 4 Timothy Kiptanui (Kenya), 10 Mulugeta Zindefu (Ethiopia). . .

Commonwealth Games: only one of the 48 Commonwealth Games (formerly British Empire Games) medals for 1500 metres or one mile since 1954 (the year of the first sub-four-minute mile) have been won by athletes who have not run Sub-4 for the mile. He is Rich Ferguson (Canada), who was 3rd in the epic Bannister-Landy mile race of 1954 in a career-best 4:04.6.

World Championships: only one of the 48 World Championships medals at 1500 metres since they were first held in 1983 has been won by an athlete who has not run Sub-4 for the mile. He is, surprisingly, the 2009 champion, Yusuf Saad Kemel, of Bahrain, formerly Gregory Konchellah, of Kenya, who does not appear to have ever raced the mile distance.

European Championships: six of the 54 European Championships medals at 1500 metres since 1954 have been won by athletes who have not run Sub-4 for the mile – oddly, four of them in the two most recent editions of the Championships. They are Tomas Salinger, (Czechoslovakia), 3rd in 1962; Klaus-Peter Justus (GDR), 1st in 1974; Nikolay Kirov (USSR), 2nd in 1982; Carsten Schlangen (Germany), 2nd in 2010; Manuel Olmedo (Spain), 3rd in 2010; Florian Carvalho (France), 2nd in 2012. Salinger's best one-mile time was 4:00.8 in 1963, achieved at the same venue of Iffley Road, Oxford, where Bannister had first broken four minutes nine years before.

Comparisons between times for one mile and 1500 metres:

Clearly, there are far fewer Sub-4 milers than should be the case, for the simple reason that there are many more races at 1500 metres, and numerous 1500 metres runners of Sub-4 potential have never had the chance to compete at one mile at all. In 2019, for example, 185 athletes ran faster than 3:40.00 for 1500 metres outdoors, whereas only 35 ran faster than the mile equivalent (as per the Hungarian Scoring Tables) of 3:57.44.

Interestingly, this difference is almost exactly reflected in the vastly impressive All-Time Lists compiled by the Swedish statistician, Peter Larsson, who at 15 August 2020 listed 8661 performances at 3:37.90 or better for 1500 metres and 1470 at the mile equivalent of 3:55.29. To be precise, 526 of these 1500 metres times were made en route to one mile, and so we can safely assume that since Bannister first broke four minutes in 1954 some 5½ times as many athletes have run 1500 metres in 3:42.22 or faster than have run the equivalent mile time of 3:59.99 or faster. Of course, a very significant number of these would have done both – maybe 1,200 or so. A further graphic illustration of the huge number of “missing” Sub-4 milers is provided by the fact that 25 countries which have not produced a Sub-4 miler have national records at 1500 metres of 3:42.22 or faster, as follows:

Angola, Argentina, Bermuda, Botswana, Chile, Democratic Republic of Congo, Ecuador, Egypt, Eritrea, Guatemala, India, Iran, Israel, Ivory Coast, Kazakhstan, Kyrgyzstan, Latvia, Liechtenstein, Moldova, Mozambique, Pakistan, Panama, South Korea, Sri Lanka, Venezuela.

Even at the very highest level there are athletes who have not run a Sub-4 mile. Of the 104 men faster at 1500 metres than 3:32.00 in the IAAF All-Time List, there are eight who do not have any mile times to their credit: Timothy Too Kiptanui (Kenya) 3:30.04 2004, Robert Kiptoo Biwott (Kenya) 3:30.10 2015, Fouad Chouki (France) 3:30.83 2003, Mulugueta Wondimu (Ethiopia) 3:31.13 2004, Anter Zerguelaine (Algeria) 3:31.21 2009, Yusuf Saad Kamel (Bahrain) 3:31.56 2009, Abubaker Kaki (Sudan) 3:31.76 2011, Mohamed Moustououi (Morocco) 3:31.84 2011.

It would be helpful to add 1500 metres best performances for all athletes figuring in the Sub-4 list, but that is a huge task and I have no plans for it at present.

The most successful high school

Four graduates of Stillwater High School, in Minnesota, have broken four minutes, all since 2003 – Ben Blankenship, Sean Graham and brothers Jake and Luke Watson.

Editor's footnote:

The Sub-4 Register was initiated by the late Bob Sparks on behalf of the National Union of Track Statisticians (NUTS), of Great Britain, and was continued by the late Ian R. Smith, and is now maintained by Bob Phillips, the editor of the quarterly journal of the NUTS, "Track Stats", with particular acknowledgments to Stuart Mazdon, manager of the NUTS website at www.nuts.org.uk. Sub-4 miles have naturally decreased in value over the years, and thanks are due to the IAAF for maintaining rankings to that level on their website in recent years.

Any additions, amendments, corrections will be welcomed by Bob Phillips, trackstats@free.fr. Readers occasionally send me details of sub-four-minute miles which have been missed by the statistical compilers, and I am happy to add these if they can be verified.
